The image features a stylized landscape. The top portion is a light blue sky. Below it, there are several layers of dark blue, rounded hills or mountains, creating a sense of depth. The word "Enthous" is written in a bold, red, sans-serif font across the middle of the image, positioned over the dark blue hills.

① The microorganism must be found in abundance in all organisms suffering from the disease, but should not be found in healthy organisms.

② The microorganism must be isolated from a diseased organism and grown in pure culture.

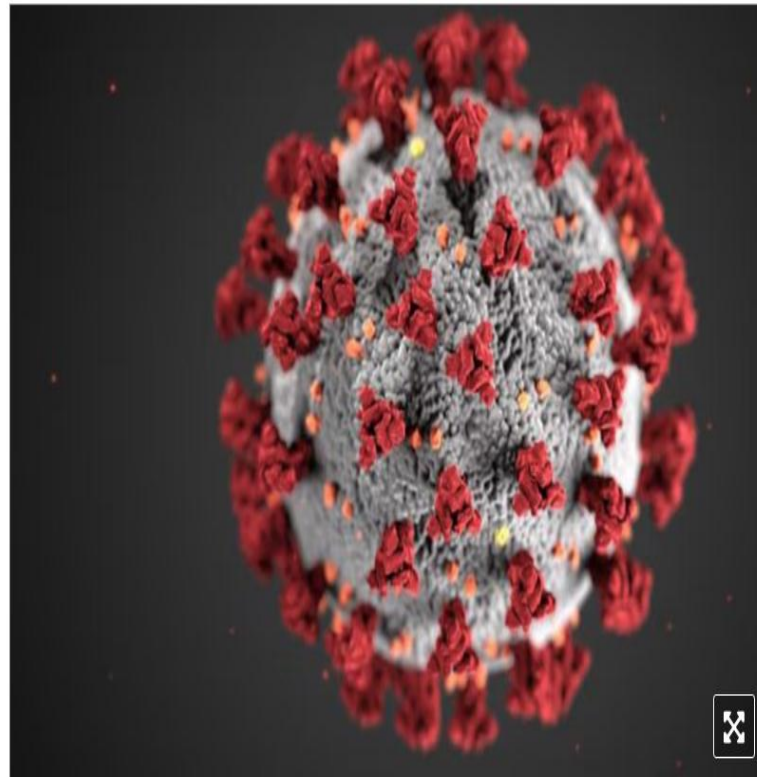

③ The cultured microorganism should cause disease when introduced into a healthy organism.

④ The microorganism must be reisolated from the inoculated, diseased experimental host and identified as being identical to the original specific causative agent.

"You have this circle, which is the virus, and then protruding from the circle are these spikes," Joyce said. "The spike is the name for this external part of the virus, and that's what gives it the name 'corona.'"

The word "corona," he said, means "crown" in Latin.

Joyce said X-ray crystallography and electron microscopy are two ways that researchers can

The Creation of the Vax-Monster

- * IN ORDER TO CREATE A VACCINE, YOU MUST:
- * 1. Use fresh tissue samples to be infected, or better said poisoned, by the junk you are going to put on it
- * 2. Historically these tissue samples came from Monkeys and Horses: Now they come from aborted Fetal Tissue by pulling them **OUT OF THE FETUS WITHOUT ANESTHESIA** , during the fetuses final dying moments. Some of these fetuses can survive out of the womb already at 5 and 7 months of age.
- * The creation of vaccines today is nothing shy of a satanic child sacrificial ritual, and they go ahead and inject these Poisons directly into your otherwise healthy blood flow.

The Creation of the Vax-Monster

* INGREDIENTS:

- * 1. Vax “viral” gook they produced from toxifying fetal tissue.
 - * 2. Aluminum adjuvant to piss the body off and produce a stronger (most likely HYPER) antigen/antibody response
 - * 3. Peanut and other NUT Oils adjuvant
 - * 4. Mono and Di Glycerides and Polysorbate 40/60 adjuvant
 - * 5. Most often Mercury products as preservatives
- * ALL THESE THINGS CREATE NEUROTOXICITY AND AUTO IMMUNE / HYPER-IMMUNE REACTIONS (Cytokine storm)

form with a "better, artificial immunity." Artificial immunity DOES NOT EXIST.

2. Vaccines are not ROTO-ROUTER or internal body LYSOL; THEY DO NOT KILL VIRUSES NOR DO THEY KILL MICROBES. This is scientifically impossible and they all understand this concept. Therefore it is completely ridiculous to believe that "my vaccine protects you and your vaccine protects me." This phrase doesn't mean anything. The scientific basis of a vaccine has ONE INTENT; to stimulate your body to make greater natural immunity.....if the vaccine is not doing this, it is worthless. Furthermore, today's vaccines are 1000 times more harmful to the population at large because they create a pandemic of neurological disorders like dementia and autism now scourging our existence.
3. Vaccines DO NOT PREVENT VIRUSES, OR FOR THAT MATTER ANY MICROBE, FROM "MUTATING." Again, this is scientifically impossible. There is NOT ONE SINGLE KEYNOTE STUDY ANYWHERE demonstrating that "viruses" mutate to begin with, let alone any keynote study proving that vaccines have prevented ANY DISEASE. Studies which point to these conclusions all bank on population statistical information on disease rates, pre and post vaccination campaigns, in which the data can easily be manipulated. They usually manipulate the data by changing the diagnostic parameters POST vaccine campaigns, narrowing them severely which will decrease the incidence of the disease reporting on paper. They as well manipulate the data by ascribing the symptoms of a particular disease to a completely different classification POST vaccine campaigns; such as was accomplished with Polio.
4. Therefore, from understanding all of the above: UNVACCINATED PEOPLE CANNOT BE WHAT IS DEEMED "ASYMPTOMATIC CARRIERS." This concept is ludicrous by their own standards. They contradict themselves every time they try to push it. If an unvaccinated person has no symptoms and is just fine, it is a completely unscientific notion, without any scientific merit backed by ANY STUDY, to assume they can be carrying ANYTHING that would be harmful to anyone else, let alone a person who is already "protected" by one of their vaccines which they tout protects and prevents disease.

The Great Polio Vaccine Debate Is Revived

By [Name]

The currently used oral polio vaccine were not only striking, but essentially unknown to the public. After all these years of being "protected" by the oral polio vaccine, four eminent scientists told the Senate subcommittee that this vaccine, indeed, has actually caused nearly all of the reported cases of polio in the United States since 1961 and claim to this may well be riskier than no vaccine at all. Dr. Jonas Salk, the man who developed the original polio vaccine now no longer used in this country told the Senate subcommittee that the live-virus vaccine, developed by Dr. Albert Sabin, was "the principal if not the sole cause" of the 140 polio cases reported in the United States since 1961. At the present time the risk of acquiring polio from the live-virus vaccine is greater than from naturally occurring viruses, "he said in Finland and Sweden, where Salk's killed-virus vaccine is used exclusively, there hasn't been a single case of polio since 1964 for Finland and 1963 for Sweden, according to Senate subcommittee on Public Health.

Autism Statistics and Facts

Autism Prevalence

Source: *Centers for Disease Control and Prevention (2023)*

- 1 in 36 children in the U.S. have autism, up from the previous rate of 1 in 44.
- In the U.S., about 4 in 100 boys and 1 in 100 girls have autism.
- Boys are nearly 4 times more likely to be diagnosed with autism than girls.
- Autism prevalence is lower among white children than other racial and ethnic groups:
 - White – 2.4%
 - Black – 2.9%
 - Hispanic – 3.2%
 - Asian or Pacific Islander – 3.3%

*The Centers for Disease Control and Prevention autism prevalence estimates are for 8-year-old children in the Autism and Developmental Disabilities Monitoring Network in 2020.

These changes reflect an improvement in outreach, screening and de-stigmatization of autism diagnosis among minority communities.

**The CDC autism prevalence estimates are for 8-year-old children across 11 monitoring sites in the Autism and Developmental Disabilities Monitoring (ADDM) Network in 2020.*
