

# Wise Traditions 2022

## Homeopathy for Developmental and Behavioural Concerns

---

ANKE  
ZIMMERMANN,  
BSC, FCAH

# Anke Bio

---

- BSc from University of Toronto, 1987
- ND From Ontario College of Naturopathic Medicine, 1991
- Canadian Academy of Homeopathy 1994 3-yr post-grad program
- CEASE Therapy training 2012 and 2014
- 31 years of classical homeopathy, many different teachers
- 11 years of non-classical homeopathy, isopathy, tautopathy
- About 11,000 hours of research on vaccines over past 11 yrs

## Developmental Disorders Interest

---

I met someone while  
in naturopathic  
college who claimed  
to have healed his  
son's autism with  
natural methods

Sparked 31 years of  
research and  
practice!

# Behavioural Challenges

---

Soon after graduating I also became very interested in helping children with behavioural challenges, mostly aggression and anxiety.

# Case, Rachel, age 10

---

"The psychiatrists want to institutionalize Rachel for life - under heavy sedation!

She is becoming stronger every day and is considered to be a danger to herself and others.

The other day she tied a rope around her neck and threatened to jump off the deck to kill herself."

## Rachel, age 10

---

“Last week she pulled a knife on her brother. When she has an attack of rage it takes two or three people to restrain her. We actually have to sit on her. At those times she has superhuman strength.”

"At one time we had a team of social workers living in our house for two weeks to try and find out what we were doing to 'drive our child crazy' as they put it."

Her attacks seemed to be neurological, almost like a seizure.

Rachel also had a number of fears, including a fear of the dark and of ghosts.

MGF was violent alcoholic

# Rachel, age 10

## **Stramonium (Datura)**

---

Angel's trumpet/Devil's trumpet

Poisonous, hallucinogenic plant

- Ailments from fright and violence
- Neurological trauma – head injuries, vaccine injuries, post-encephalitis
- Violence to self and others and/or fear of violence
- Usually fear of being alone, the dark, ghosts
- **Alone in the wilderness**

## Rachel, age 10

---

Rachel had several doses of Stramonium in 200C and 1M over the next few months.

She fully recovered and was never institutionalized.

She is probably a mother herself by now.

**Cost of the remedy: \$12**

# What I've learned in 31 years

---

Developmental and behavioural challenges are **virtually always multifactorial**, the more severe, the more factors, including:

- 1) Inherited factors
- 2) Emotional stress and/or toxins during pregnancy, labour and delivery (meds, vax, US)
- 3) Stress and toxic exposures in the child
- 4) Nutritional deficiencies

# Homeopathy – Like Heals Like

## Tautopathy – Same Heals Same

---

# Potentisation

# Tautopathy

## 'Same Heals Same'

Remedies made from:

- Vaccines
- Drugs, medical and recreational
- Heavy metals, mercury, aluminum
- Pesticides, other chemicals
- Radiation, ie Ultrasound, X-ray, Gamma-ray, wifi, cell phone etc

# Homeopathy

---

Therapeutic  
AND  
Diagnostic!!

# Developmental Disorders & Concerns

---

Developmental disorders are on the rise worldwide

17.8% or 1 in 6 of US children are diagnosed with a Developmental Disorder as per CDC

20% have learning or attention issues (!) 11% diagnosed with ADHD

Over 4 million kids in the US have at least one learning disability

2.5% or 1 in 58 are now diagnosed with autism (CDC), possibly 1 in 39, depending on study

10-11 % of young children have speech and language disorders

20% are delayed in language development

# Behaviour Problems

---

2016 report on 50,212 children: 1 in 6 U.S. children aged 2–8 years (17.4%) had a diagnosed mental, behavioral, or developmental disorder.

2016-2019 - Age 3-17:

- Behavior problems 8.9% (app 5.5 million)

# Ashanti, age 4

---

Recently escalating aggression

Especially to baby sister (10 m old)

Pushing, pinching, squeezing, pulling her hair, stepping on her hands and feet, poking her in the eye

No remorse!!

Baby photos were like mugshots

Did not smile until 9 m old

# Ashanti, age 4

---

Developed severe nightmares after baby sister born

“Stop that! Give me money!

I don’t like you!”

Unable to sleep without touching parents from 9 m on

Mom also had bad nightmares as a child

## Ashanti, age 4

Only shows anger, never sadness

Will urinate herself when angry

---

Started when mom tried to go back to work, was already potty trained

Wakes up angry

**Traumatic pregnancy and delivery:**

**I felt tortured!"**

# Ashanti, age 4

---

*"I was starved and given only two crackers from midnight to 3:30 am. I was crying from hunger during the labour!"*

*"I was tied to an operating table for a C-section and faded in and out of consciousness. Then they moved me into a recovery room where I was left unattended and freezing cold, shivering on the table, still tied up and separated from my baby."*

*"There was nurse in the room, but she totally ignored me! I asked for a blanket and was told I could not have one!"*

*"And the spinal anaesthesia was so strong that I could not walk at all for 24 hours afterwards! I felt totally traumatized by the experience and very angry! I ended up with post-partum PTSD."*

# Ashanti, age 4

---

*"My mother was a victim of child abuse with lots of violence and witnessing violence.*

*"She later became addicted to prescription medications.*

*"She also has no remorse, will not apologize. She'll just cover up everything."*

# Ashanti, age 4

---

## Epidurals: Fentanyl + Bupocaine

# Ashanti, age 4

---

Needed: A remedy without  
remorse!

Nightmares

Aggression and anger

Mom had excess epidural,  
traumatic delivery (abuse)

MGM was prescription drug  
addicts, fam history of  
severe abuse, lack of  
remorse

**Morphinum 30C**

# Morphinum

**Morphin is a derivative of opium**

**- Fentanyl is synthetic opioid**

MM of Morphinum:

- Ailments from fright, fear or anxiety

- Anger at trifles, morose, cross, fretful

- Liar – never speaks the truth, does not know what she is saying, deceitful

- Moral affections – want of moral feelings

- Suicidal disposition

- Will, weakness of

# Ashanti, age 4

---

P: Morphinum 30C

FU 2 weeks later:

*"Ashanti is showing more remorse and empathy! She is not trying to harm baby sister now. She is playing gently with friends. She now has a childhood look in her eyes and seems much happier.*

*"However, her intensity is still there. When she hugs it is still tight, when she loves, it is strong and intense."*

# Ashanti, age 4

---

## Three months later:

*"I wanted to email to say thank you! Ashanti has become a different kid and an amazing big sister. It was a huge transformation after such small amount of time working with you. I cannot thank you enough!"*

*"My husband had no idea that I was treating Ashanti with homeopathy. He would start bragging about the changes in her behavior and how much he has loved seeing who she has become. When I confessed, he was shocked and interested in homeopathy!"*

# Cora, age 3

---

Nov 2021:

3-yr-old girl with increasingly severe behavioural issues

Colicky first 8 m

Always cried a lot

Now: Tantrums x 20, throwing things, screaming at top of lungs until red in the face

Un-co-operative, bucks body, turns into wet noodle, flops around for diaper changes, car seat

# Cora, age 3

---

In-affectionate, hates to be hugged, kissed or cuddled

Pushes us away and says NO!

“I don’t need you!”

Lacks co-ordination, trips over feet, runs into walls

No vaccines

Extra US – 4-5, plus Mom worked with US!

# Cora, age 3

---

“Horrible birth, had her hands up coming out, felt like a corkscrew was coming out, as if I was being shredded”

P: US 30C twice a week for 2 weeks

“After the first dose of US she got her sleepy and put herself to bed. Never before. Next 4 days extra grumpy.

Since then, much less irritable and more affectionate! Cuddles on sofa with Dad

Before 20 tantrums a day, now 1-2 and much shorter!

## Cora, age 3

---

Not tripping over her feet as much

With initial aggravation fell a lot more and ran into wall 2-3 times

Can get her into car seat without any problems now, before fighting us every time

Willing to go on potty now, before we had to hold her down and she was still trying to get away!

P: US 30C as needed

# Cora, age 3

---

5 month later (April 2022)

Still using US as needed, but  
sxs coming back

US 200C – no change

Visit:

“Now she is really clingy with  
her daddy. If he has a shower  
she stands there the whole  
time, crying

If he is home: “Sit with me, I’m  
lonely!” “I’m over here all by  
myself!”

## Cora, age 3

---

This was an interesting development!

Non-affectionate to super clingy!

? Hx of abandonment?

Cora's mother started drinking when she was 11. Passed out a lot. Had to look after siblings, make dinner

Cora did not want to latch after birth

# Cora, age 3

P: LAC MATERNUM

LINK BETWEEN SPIRIT  
AND MATTER

NOURISHMENT OF THE  
BODY AND SOUL

MOTHER ARCHETYPE

# Cora, age 3

---

July 20/22

I messaged mom:

“Cora is doing so much better! This remedy really worked!

“Much more affectionate now, says I love you all the time

“No longer clingy, ‘I didn’t cry when Daddy left!’

“I’m finally ENJOYING being a parent! These changes have been invaluable to our family, we’ll be forever grateful for your service!”

# Ultrasound proving

---

US: Potential to destroy the sacred space of darkness and safety in a mother's womb

May result in an over-stimulation of the senses

May leave the unborn with a confused sense of self

Uncomfortable feeling of emptiness

# Ultrasound proving

---

“I feel restless and in a hurry.”

“I am overstimulated like after too much coffee.”

“I need to rock back and forth on my chair. I am impatient.”

“My nervous system is too open.”

“A dark force is penetrating me; it reminds me of Star Wars.”

“I felt exposed, invaded, vulnerable and overpowered.”

# Sarabi – age 5

5-y-old girl, seen August 2020

CC: Aggression towards herself and others

Bites and scratches self and others when frustrated. Y of 3. Says wants to kill self

Hates having her nails cut.

“They are my protection!”

“I have claws and I’m protecting myself! I defeat my brother with my claws! My claws are really small but really, really good at scratching people!”

# Sarabi, age 5

---

Everyone in the house has scratch marks, except mom.

Swears and makes rude gestures when angry, “But not to strangers, they might be prisoners!”

W since sister changed to diff grade, WW Mom going back to work

VV attached to mother’s breasts, 4.5 before fully weaned. Refused solids until age 1. Says mom’s breasts are her’s, not mother’s.

## Sarabi, age 5

---

V sad about not breast-feeding anymore

V attached to mom in general

Wants to take care of mom

Mom wonders about generational separation trauma.

S's father: Mom left him at 2.5, few m later sent police to get him.

PGF sent to boarding school at age 4-5

# Sarabi, age 5

---

Concerns about being born last, so will die last and be left all alone.

Tell mom: “You love Daddy more than me.”

MGM 2017. S still talks about not wanting GM to be dead.

Struggles to throw out papers or old socks with holes in them.

Still talks about former house and that it was ‘abandoned’ (7 m old)

# Sarabi, age 5

---

Animals?

Very afraid of dogs!

Face to face with a husky at age 2 – primal scream!! Said thought dog was a lion!

Scared of cats, too.

# Sarabi, age 5

---

Also has weak IS  
with frequent flus  
and colds

Swollen tonsils

Raspy breathing

Fussy eater.

Has never wanted  
to taste meat

# Sarabi, age 5

---

## Analysis:

- Aggression with scratching and biting self and others
  - My nails are my protection
  - Overall attached to mother's breasts, breast-feeding
  - Separation anxiety
  - Sxs got worse with sister moving to diff class, mom going back to work
  - Possible generational abandonment trauma
  - History of frequent colds, swollen tonsils
- Fear of dogs, cats, thought dog was a lion

# Sarabi, age 5

---

Milk remedies in  
homeopathy:

- Mother-child bond
- Nursing, milk
- Fear of abandonment
- Orphan remedies

Question:

Which milk??

# Sarabi, age 5

---

Lac leoninum,  
lion's milk

Sent mom article  
on the remedy

Very independent

The 'Brave One'

Authoritative

"The Boss"

# Sarabi, age 5

---

Lac leo 200C

FU one m later:

Has not been  
scratching anyone,  
maybe sister a little

Much less separation  
anxiety can leave mom  
okay now at preschool

Got cat 2 days after Rx,  
called him Simba!

## Sarabi, age 5

---

Been playing better  
with sister, not so bossy

Only said wanted to kill  
self a couple of times,  
much better

Breathing better, not so  
raspy

# Sarabi, age 5

---

Followed up for over a year

She needed a few more doses of Lac leo as she relapsed a bit here and there, but overall did extremely well on Lac leoninum

A fabulous result from the milk of a lioness for a little humanoid lion cub!

**That is the magic of homeopathy!**

# Divya, age 13

---

History of social anxiety,  
negativity and depression

On Prozac from age 9

Switched to Zoloft at age 12

Developed severe intrusive  
thoughts!

Of becoming a bad person!

Of doing bad things!

Divya, age  
13

---

Her psychiatrist then  
diagnosed her with  
Obsessive  
Compulsive Disorder

Took her off Zoloft  
but the intrusive  
*thoughts remained*  
for the *next few*  
*month!*

# Divya, age 13

---

Remedy: Homeopathic  
Zoloft, 30C

Within two days the  
intrusive thoughts  
diminished, then  
returned after two  
weeks.

She got Zoloft 200C and  
has had no more  
intrusive thoughts!

# Oliver, Age 8

---

Age 8 when we met, April 2020

DX Autism, severe OCD,  
suspected PANS/PANDAS

Very aggressive

Irritability from 5 m old

Attacks parents if frustrated,  
claws at their faces

Obsessed with ripping, tearing  
and cutting things

Always has pair of scissors in  
hands

# Oliver, age 8

---

Not yet toilet trained

Only 150 words,  
requests, people, food

Sleep issues, fear of  
dark, needs lights on  
and mom w him

First vax 4 m – dev  
night terrors, every  
night! Plus became  
very irritable and fussy

# Oliver, age 8

---

2<sup>nd</sup> vax 7 m – dev eczema on cheeks at 8 m

3<sup>rd</sup> vax at 10 m – eczema flared, allergic to soy, dairy, grass, trees, turkey...

By time was 13 m old had lost all of his words

By 16 m – severely bloated belly

Dx autism just before 2

Downhill since

# Oliver, age 8

---

## Pregnancy, L&D

Intense work stress, hi conflicts with superior. Lots of extra work, felt totally unsupported. Angry and cried a lot. Worked until 5 days before birth

4-5 US due to concerns with placenta

Induced 3 days early due to hi BP

Pitocin drip, felt pressured, chaotic

Stalled at 8 cm for many hours

# Oliver, age 8

---

Morphine shot given, went to sleep a few hours

Nitrous oxide given – became super irritable and aggressive

Plus projectile vomiting!!

After 28 hours, baby's heart rate dropped

Prepped for C-section

Epidural – became freezing cold, *“I could not stop shaking, was just lying on the operating table and nobody did anything about it. I felt almost violated, certainly not honoured!”*

# Oliver, age 8

---

P: Stramonium – night terrors, fear of dark and alone, aggression

Common remedy for neurological problems assoc with violence and aggression

Aggression drastically diminished, stopped attacking parents

OCD sxs diminished somewhat

Added Poly-vaccine Rx

# Oliver, age 8

---

3 m later (Oct 2021):

Developed frequent urination and crying in pain, got rxs for bladder infection

Then: Compulsive spitting and urinating on everything

*“Refuses to wear diaper and pees a few drops into it. Then he spits into the diaper and licks the urine and spit up in very obsessive way. Gets extremely agitated if we try to stop him, yelling, screaming, hitting!”*

*P: Hyoscyamus 30C*

*Next day the beh stopped!*

# Oliver, age 8

---

Next visit, Nov 2021:

New sx's:

Lining up everything

Obsessed with smashing rocks with hammer

Obsessed with handwashing, esp at night, gets up several times to wash hands

P: Syphilinum – miasm

? Alcoholics? Yes, MGF and his father

P: Syphilinum 30C – stopped washing

Meanwhile speech improving with every dose of Poly-vax rx

# Oliver, age 9

---

Dec 2021

Another new state:

Running around wildly, licking his fingers and touching everything!

Plus, obsessively asking for sweets

P: Saccharum officinale

May be related to feelings of abandonment, not feeling enough love, Mom shared he had intense sep anx age 2-4

# Oliver, age 9

---

Jan 2021: New problems:

Aggression is back, hitting, scratching and kicking family

Sleep is worse again, up 2:30 – 5 am

Eating 7-10 sheets of copy paper/d!

Incessantly asking for things, manic, frantic

Red ears in evening – same age 3-4

BUT: Still language gains, speaking more clearly, new words

Still better than this time last year

P: Belladonna 30C and 200C, calmer, ears n

# Oliver, age 9

---

But cutting and eating of paper remained a problem

Grinding teeth

P: Veratrum album – White Hellebore, intense restlessness can be feature, in MM under cutting things into small pieces

Reduced paper eating by 80%

And suddenly fully potty-trained!

Can now speak in full sentences  
“Where is your coffee?”

# Oliver, age 9

---

But: New symptoms again –

Sniffing and scrunching his face  
and crying suddenly.

Grief layer coming up?

P: Ignatia amara

Common remedy for ailments  
from grief, disappointment

Poly-vax 50M

Veratrum if cutting returns

# Oliver, age 9

---

March 2021:

Back and forth between Bell, Hyos, Verat, Ignatia for a few weeks

Much less rock crushing

Fine motor skill has improved a lot

A year ago could only draw a big X or O on paper, now he can print his name 1" tall

Can do up zipper now, not before

# Oliver, age 9

---

May 2021

New symptom:

Ver jumpy now, startles easily

Likes to hide under blankets

Loves music

Still cutting paper all day

P: *Tarentula hispanica*

# Oliver, age 9

---

Tarentula helped greatly!

Overall less hyper, calm at bedtime

New: Now lines things up in certain order, then moves them to another location, have to be in exact same order.

Still cutting, but now he can cut out complex shapes, before just strips and pieces

Can use computer mouse now

Only crushes rocks a few minutes here and there now

Knows his name and parents' names and learning address!

# Oliver, age 9

---

But: June 2021

Frequent urination is back!

Has to go every ten minutes

Still bites his nails a lot, toenails also – poss miasm coming up

P: Medorrhinum 200C

Prevnar 30C

Tarentula as needed

# Oliver, age 9

---

14 m into care:

Wonderful progress

Not aggressive anymore, before attacked parents daily

Could not do any academics in school, only behaviour management

Sleeping much better, mostly through the night

Not destroying clothes and sheet with cutting anymore

Overall much less destructive

Nearly completely toilet-trained now

Speech has progressed a lot, sentences now

Cognitive function much improved

Fine motor skill as significantly improved

# Complex Cases

Miasms

Vaccines

Pharmaceuticals

Pesticides and herbicides

Recreational drugs

Pollution, Exhaust

Electromagnetic radiation

Increased intervention in  
preg, L&D

Emotional stress

# Conclusion

---

Homeopathy and tautopathy can be therapeutic as well as diagnostic

Safe ways to identify and heal injuries from toxins, including vaccines, medications, chemicals and heavy metals, as well as various traumas, physical and emotional

**But: A HUGE threat to Pharma!**

Our children, grandchildren and other future generations are at risk here!

Homeopathy offers hope 😊

## To parents

---

Please think twice before using vaccines and medications, use natural methods instead

Consider homeopathy to mitigate existing damage, HP to help mitigate infectious disease

**Safe, effective and cost-effective**

Treatment addresses the root causes

# To Professionals

---

Let us put aside ideologies and search for the truth in spite of inconvenience, persecution and potential loss of licence, and let's go down on the right side of history!

# The End. Thank you!

---
